

PUBLIC OPINION IN AMERICAS

PUBLIC PERCEPTIONS OF CORRUPTION

The public were asked about their perceptions of corruption in their home country. The survey captures views on whether people feel that overall corruption levels have increased or decreased in recent years, the extent of corruption overall in the public sector and then in different institutions. For the first time this year, we also asked people how about the importance of personal relationships when trying to get things done and the influence of big interests in government decision making.

More than half of people surveyed in the region think that corruption has increased in their country in the past 2 years.

Figure 1: How has the level of corruption changed?

% of people from each of the 14 countries surveyed in AMERICAS

Over the past 2 years, how has the level of corruption in this country changed?

The average results across the 14 countries surveyed find that 58% of people think that corruption had increased in the past two years with 29% thinking that the situation had stayed the same and 13% thought that it had decreased.

Close to three quarters of people surveyed in Argentina and Mexico think that corruption has increased or increased a lot in the past two years.

We then asked people how big a problem in general corruption is in the public sector. On a scale of one to five, where 1 means not a problem at all and 5 means a very serious problem, the average score across the 14 countries in AMERICAS was 4.3, indicating a very serious problem with the public sector institutions in the region.

Figure 2: How big is the problem of corruption in the public sector in AMERICAS?

Average score on a scale of 1-5 from the 14 countries surveyed in AMERICAS

On a scale of 1-5, where 1 is not a problem at all and 5 is a very serious problem, to what extent do you believe corruption is a problem in the public sector in your country?

Figure 3: How important are personal contacts?

% of people in AMERICAS

In your dealings with the public sector. How important are personal contacts and/or relationships to get things done?

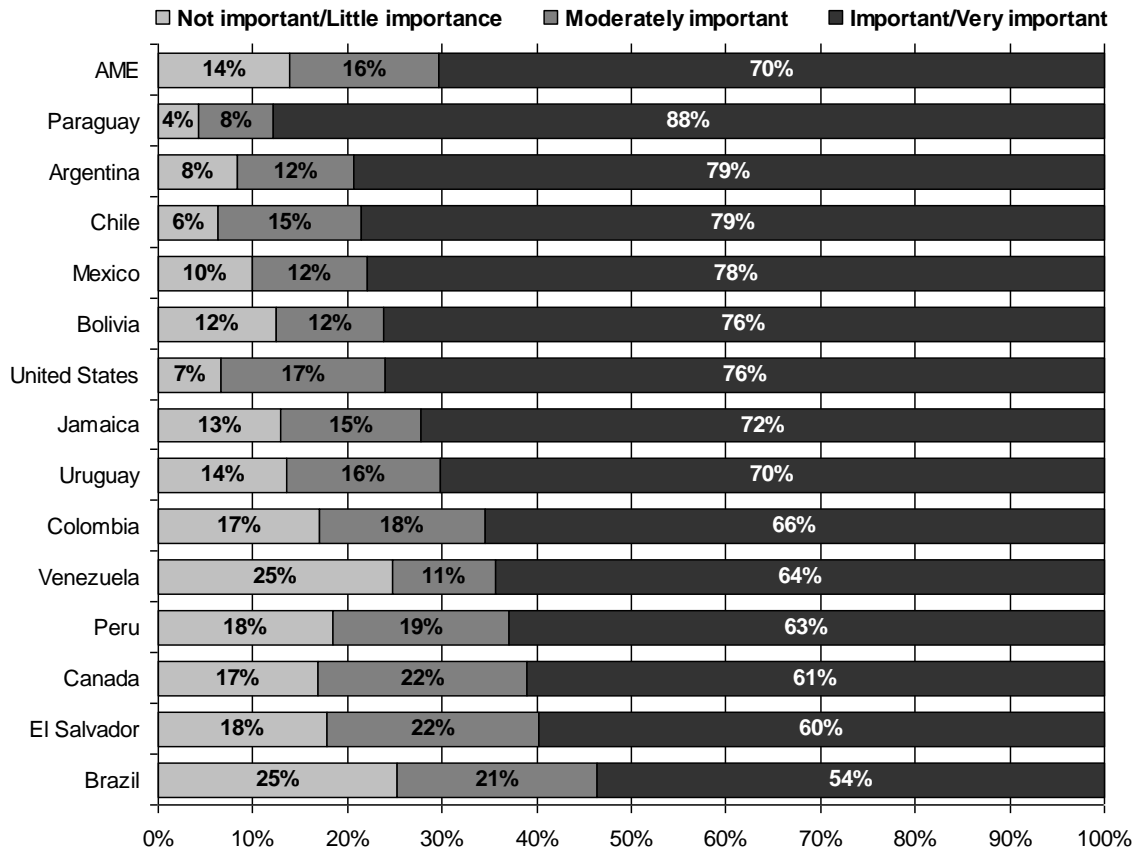

Figure 4: How influential are 'big interests'?

% of people in AMERICAS

To what extent is this country's government run by a few big entities acting in their own best interests?

PERSONAL EXPERIENCES OF BRIBERY *

The survey asked people if they had come into contact with one of eight services. For each of these services they were then asked if they had paid a bribe. These results were broken down by gender and age, to better understand where the bribes are paid and who is paying them. Those that had paid a bribe were then asked why they had paid the bribe.

Across the region, an average of 16% of people have paid a bribe to one of eight service providers in the last 12 months

Figure 7: Bribe payers

% of people in AMERICAS that have paid a bribe when coming into contact with any one of 8 services.

In the past 12 months, if you or anyone living in your household had a contact or contacts with one of eight services, have you paid a bribe in any form?

* Data from Brazil was removed for questions in this section due to validity concerns

Across the region, people were most likely to have paid a bribe to the police. An average of 26% of people that have come into contact with the police in the past 12 months said that they have paid a bribe.

Figure 8: Bribe payers in, by service

% of people in AMERICAS that have paid a bribe

In the past 12 months, if you or anyone living in your household had a contact or contacts with each of the following eight services, have you paid a bribe in any form to this service?

IEWS ON THE FIGHT AGAINST CORRUPTION

Governments in AMERICAS have been engaged in the fight against corruption to varying degrees in recent years. People were asked for their views on the effectiveness of the current government in the fight against corruption.

Figure 10: How effective are the governments in fighting corruption?

% of people in AMERICAS

How effective do you think your government's actions are in the fight against corruption?

GETTING INVOLVED

People were asked about their willingness to get involved in the fight against corruption. Respondents were first asked if they believed that ordinary people can make a difference in the fight against corruption. They were then asked more directly if they would be willing to get involved themselves through a number of different ways, including if they would be willing to report an incident of corruption. Of those people that would be willing to report, we asked them where and of those people that would not report, we asked them why not. Finally we asked if people had ever themselves stood up against corruption by refusing to pay a bribe.

APPENDIX: SURVEY METHODOLOGY

Exactly 1000 people from each of the 14 countries in AMERICAS were surveyed between September 2012 and March 2013 as part of the Global Corruption Barometer 2013 survey.

The survey sample in each country has been weighted to be nationally representative where possible. The survey questionnaire was translated into local languages and used for face to face, CATI (Computer Assisted Telephone Interviewing) or online interviews depending on the country context.

The data has been checked and analysed at the Transparency International Secretariat in Berlin and verified by an independent analyst. The results presented in the report do not include ambiguous responses (don't know/no answer). AME results are the un-weighted average across the 14 countries surveyed and any apparent small difference in the aggregated global results is due to rounding differences. The full questionnaire in all languages and results at individual respondent level are available free of charge on request from Transparency International.
